Claude for Work: the complete call plan

Work sample submitted with Jared Chapman's application for Sales Enablement Trainer, Claude Products (Nov 2026). A personal project, not affiliated with Anthropic. Drafted with Claude Code; every product claim in section 3 was checked against the cited Anthropic page on Nov 4, 2026, and items that could not be verified are marked as such rather than guessed. Companion to AI Ready Reps (aireadyreps.com), whose guardrails it follows.

Guardrails this plan follows (from AI Ready Reps): public data only in demos; every product claim from a cited vendor page; no comparisons to other vendors; drafts, never sends; no profiling of individual people; no promised time savings.

---

1. Audience, goal, and what success looks like

Audience. A sales leader or RevOps lead who already believes AI can help reps and is stuck on what reps can safely do with it. They fear data leaving the company, reps pasting customer information into the wrong tool, and another tool nobody uses.

Goal of the call. Agree on one low-risk pilot: 3 to 5 reps, 90 days, green use cases first. Not a rollout, not a contract.

Success looks like one of these, in order of preference:

1. A named pilot sponsor, a rep count, and a day-30 check-in on the calendar.
2. Agreement to send the Legal and IT question list and reconvene after they answer.
3. A clear "not now" with the reason written down.

Not success: a vague "send me some information."

---

2. Before the call (15 minutes)

- [ ] **Run the account brief** on public pages only (the AI Ready Reps account-brief reference implementation, or Callsheet once it exists). Read the "Verify before the call" list. Do not research individuals.
- [ ] **Guess the plan.** Fewer than 150 seats and no audit or SCIM need: Team. Compliance team, SCIM, audit logs, retention rules, HIPAA: Enterprise. Section 3 has the feature split. You will confirm it on the call, not assume it.
- [ ] **Guess the personal-account risk.** If the company has no approved AI tool, assume reps already use personal accounts. That is the opening problem.
- [ ] **Pick the demo path** you expect to need (section 8) and stage it on a public company that is not the prospect and not a customer of theirs.
- [ ] **Re-read section 3** so every number you say has a date attached.
- [ ] **Open the one-pager** and nothing else.

---

3. Facts you can say, with source and date

Say only what is in this table. If a question falls outside it, the answer is "I'll confirm that with my account team and send you the page."

Topic	What you can say	Source, date checked
Training on data, commercial	"By default, we will not use your inputs or outputs from our commercial products (e.g. Claude for Work, Anthropic API, Claude Gov, etc.) to train our models." Exception: explicit feedback such as thumbs up or down, or choosing to allow it.	privacy.claude.com, "Is my data used for model training?" (commercial), page dated Aug 18, 2026; checked Nov 4, 2026
Feedback data	Thumbs up or down stores the whole conversation for up to 5 years, de-linked from user and customer IDs. Owners on Team and Enterprise can turn off member feedback under Organization settings, Data and Privacy, "Rate chats".	Same page
Consumer plans are different	Free, Pro and Max accounts choose whether chats are used to improve Claude. That choice does not apply to Team and Enterprise, which sit under the Commercial Terms.	privacy.claude.com consumer article dated Mar 16, 2026; Anthropic news post "Updates to Consumer Terms," Aug 28, 2025 (re-read before quoting the five-year retention figure for opted-in consumer accounts)
Controller and processor	On Team and Enterprise the customer is the controller and Anthropic is the processor, acting on the customer's instructions.	privacy.claude.com, "Does Anthropic act as a data processor or controller?"; checked Nov 4, 2026
Team plan	2 to 150 seats. Standard seat $20 per month billed annually or $25 monthly; Premium seat $100 or $125. SSO, domain verification, central billing, spend caps at org and user level, admin controls for connectors, org-wide skills deployment, usage analytics. Connectors: Google Drive, Gmail, Google Calendar, GitHub, Microsoft 365, Slack. Claude Code and Cowork included.	claude.com/pricing and support.claude.com "What is the Team plan?"; checked Nov 4, 2026. Note: the help article lists role-based permissioning on Team; the pricing table marks role-based access Enterprise-only. Say "check the current pricing page" if asked.
Enterprise plan	Everything in Team plus audit logs, SCIM, custom data retention controls, Compliance API, Analytics API, customer-managed encryption keys, US-only inference, HIPAA-ready configuration with a BAA, IP allowlisting. Priced per seat billed annually (US$20 per seat per month on the pricing page) plus usage at API rates; 20-seat minimum self-serve, 50 sales-assisted.	support.claude.com "What is the Enterprise plan?" dated Sep 1, 2026; claude.com/pricing; checked Nov 4, 2026

Topic	What you can say	Source, date checked
Certifications	SOC 2 Type I and Type II; ISO 27001:2022; ISO/IEC 42001:2023; HIPAA-ready configuration with a BAA available. Documents through the Trust Portal.	support.claude.com "What certifications has Anthropic obtained?"; checked Nov 4, 2026
Data residency	Regional data residency and inference are offered through AWS Bedrock, Google Cloud Vertex AI and Microsoft Foundry (Europe, US, Canada, Asia-Pacific). The claude.ai Enterprise page lists US-only inference as a feature and no regional storage option.	claude.com/regional-compliance and the Enterprise help article; checked Nov 4, 2026
Connectors and approval	Gmail, Calendar and Drive connectors: "By default, each action Claude takes on your behalf requires your explicit approval." Sending, replying and forwarding email asks for approval before each action. On Team and Enterprise an Owner must enable connectors before members can connect, and owners decide whether members may let actions run without asking.	support.claude.com "Use Google Workspace connectors"; checked Nov 4, 2026
CRM connectors	HubSpot connector is "Anthropic verified," made by HubSpot, sign-in required, can "search and update contacts, companies, deals, tickets, campaigns, and more." Salesforce connector is marked beta. The page does not state plan availability or an approval rule; the Sales plugin says "reps review and send."	claude.com/connectors/hubspot and claude.com/solutions/sales; checked Nov 4, 2026
Sales workflows Anthropic names	Account research, meeting prep, proposals and RFPs, pipeline and forecast, CRM updates; a Sales plugin with account research, call prep, call summaries, pipeline review, forecasting.	claude.com/solutions/sales; checked Nov 4, 2026

What is **not** in the table and must go to the account team: contract terms, discounts, regional storage for claude.ai, anything about a competitor, roadmap dates.

---

4. Call flow, 30 minutes

Minute	Segment	Your job
0 to 2	Opening	One sentence on the problem, one question. Stop talking.
2 to 12	Discovery	Three questions with follow-ups. Write down their words.

Minute	Segment	Your job
12 to 17	The data answer	Verified facts, then the personal-account point.
17 to 25	Show one workflow	The one tied to their biggest time cost. Public data only.
as they come	Objections	Section 9. Never bluff.
25 to 28	The pilot offer	Three reps, three green use cases, day-30 check-in.
28 to 30	Close	Confirm the next step and the date.

If the call is 15 minutes: opening, two discovery questions, the data answer, the pilot offer. Skip the demo and offer it as the next meeting.

---

5. Opening

Standard. "Most teams I talk to are past 'should we use AI' and stuck on 'what can our reps safely do with it.' I can help with the second question. Can I ask how reps use AI today, approved or not?"

If they opened with a fear ("we're worried about data"): "Good, that is the right first worry. Can I tell you what the default is, with the page it comes from, and then ask how reps use AI today?"

If they opened with enthusiasm ("we want every rep on this"): "Then the fastest way there is a small pilot that Legal and IT can say yes to. Can I ask three questions first?"

Do not open with a product description. Do not open with a statistic.

---

6. Discovery

Ask all three. Write down their exact words; they go into the follow-up email and the CRM note.

Q1. "Which AI tools are reps using right now, and on personal or company accounts?"

- Follow-up: "How do you know?" (If they don't, that is the finding.)
- Follow-up: "Has anyone pasted something they shouldn't have?"
- What it tells you: whether the first pilot step is moving reps onto a company account. "Personal accounts" moves the data answer to the front of the call.

Q2. "What has Legal or IT already said no to, and why?"

- Follow-up: "Was it the tool, the data, or the lack of a policy?"
- Follow-up: "Who would need to say yes to a 90-day pilot with public data only?"
- What it tells you: who the real approver is and which section 3 facts to send them. Name that person in the close.

Q3. "Which task eats the most rep hours: research, call notes, first drafts, or CRM updates?"

- Follow-up: "What does a rep do today for a first call with a new account?"
- Follow-up: "What happens to the CRM after a call, honestly?"
- What it tells you: the demo path (section 8) and the pilot's first green use case.

Optional Q4, if time: "If this works, what would you want to be true at day 90?" Their answer becomes the pilot's success measure.

---

7. The data answer

Say it in this order, and show the page if you can.

1. "By default, Anthropic does not use inputs or outputs from its commercial products, including Claude for Work, to train its models. That is on their privacy page, dated August 18, 2026."
2. "Team and Enterprise are under the Commercial Terms. The consumer plans, Free, Pro and Max, are different: those users choose whether their chats are used for training."
3. "So the risk is not the work plan. It is a rep using a personal account. That is why step one of any pilot is moving reps onto the company account, where the Owner controls connectors and feedback."
4. "Your Legal team should confirm this against the contract. I'll send the pages."

Do not say: "never," "guaranteed," "fully private," or anything about where data is stored unless they ask (then section 3, data residency, and hand the rest to the account team).

If they ask about feedback buttons: "Thumbs up or down sends that conversation to Anthropic, de-linked from your IDs, for up to five years. Owners can turn that off for members. I'd recommend turning it off for the pilot."

---

8. Show one workflow

Pick from Q3. Public data only. One company that is neither the prospect nor their customer. Every fact on screen must be checkable.

Path A: Research (green). "A cited account brief from public pages."

- Setup: a public company with a recent 8-K or news item.
- Say: "I'll ask for a one-page brief before a first call. Watch where every line comes from."
- Point at: a trigger event with its filing link; a hypothesis labeled as a hypothesis; the "verify before the call" list.
- Do not: open a person's profile; let an uncited line stand; claim the brief is finished work.

Path B: Call prep (green). "Objection practice from the rep's own notes."

- Setup: a short, invented set of call notes with roles instead of names ("their CFO," "the IT lead").
- Say: "Play the buyer. Give me the three objections this CFO will raise, then let me practice."
- Point at: the objections come from the notes, not from the model's guesses; names are roles.

- Do not: paste real notes; let it invent facts about the company.

Path C: Admin (green, then amber). "Tighten a draft the rep wrote."

- Setup: a draft follow-up email you wrote, 200 words, no customer names.
- Say: "Cut this to 120 words, keep the two priorities in the customer's words, one next step."
- Then, if they are curious: "With the Gmail connector on a company account, this saves as a draft. Claude asks for approval before any send. The rep still presses send."
- Point at: the approval prompt; the draft folder; nothing sent.
- Do not: send anything; connect a real inbox on the call.

Close the demo with one sentence: "That is one green task. The pilot picks three of these and measures them."

---

9. Objections

They say	You say	Source or rule
"Will it train on our data?"	Quote the commercial default, with the date. Point to the contract; ask Legal to confirm.	Section 3, privacy page, Aug 18, 2026
"It makes things up."	"True of every model. The habit is: every fact needs a source, and a person checks before anything goes out. You saw that in the brief."	AI Ready Reps amber rule
"Another tool to manage."	"Then start with the one task that costs the most hours, with three to five reps. If it doesn't earn its place in 90 days, stop."	Pilot design
"How do we know it works?"	"The pilot measures it: a quiz before and after, which use cases reps tried, near-misses caught, and minutes per task on two or three tasks. Real numbers or none."	AI Ready Reps pilot kit
"What does it cost?"	Team: $20 per seat per month annual, $25 monthly; Premium seats $100 or $125. Enterprise: seat price plus usage at API rates, 20-seat minimum. "Prices change; I'll send the current page."	claude.com/pricing, Nov 4, 2026
"Our data has to stay in the EU."	"Regional residency is offered through Bedrock, Vertex and Foundry. For claude.ai itself I'd rather your account team answer in writing than have me guess."	claude.com/regional-compliance
"We're in healthcare; we need HIPAA."	"Enterprise has a HIPAA-ready configuration with a BAA. Which models and features are covered is a question for the account team, in writing."	Certifications page; Enterprise article
"We already have [another vendor]."	"I won't compare them; I'd rather show you what this does on your top task and let you decide. What does the other tool do for that task today?"	No-comparison rule

They say	You say	Source or rule
"Reps will paste customer data anyway."	"They might, which is why the pilot starts with green use cases on public data and a one-page rule reps can actually follow. Owners can also turn off connectors and feedback."	AI Ready Reps traffic-light rule
"IT won't approve connectors."	"Then the pilot runs without them. Research and drafting need no connectors. Connectors are a day-60 question, and the Owner turns them on, not the rep."	Connector article: Owner must enable
"What about our developers and Claude Code?"	"Out of scope for this call. Claude Code is included in Team and Enterprise seats; I'll connect you with the account team for that conversation."	Team and Enterprise articles

If an objection is not in this table: "I don't want to guess. I'll get you the page." Then write it down for the account team.

---

10. The pilot offer

From the AI Ready Reps pilot kit. Say the shape, not the numbers you hope for.

Shape: 3 to 5 reps, 90 days, one manager as sponsor, company accounts only, public data only in weeks one to four.

Days	What happens	Who
0 to 7	Reps take the baseline quiz. Walk through the traffic-light rule. Confirm the approved plan and move reps onto it. Turn off member feedback.	You, sponsor, IT
8 to 30	Each rep picks three green use cases and runs them on real work. Log each one. Day-30 review: what saved time, what nearly went wrong.	Reps, sponsor
31 to 60	With the sponsor's sign-off, each rep adds one amber use case with its listed control (for example, a cited account brief logged to the CRM after approval).	Reps, sponsor
61 to 90	Read the permission ladder together. Decide which rung each workflow sits on. Retake the quiz. Collect one sentence per rep.	Everyone

What you measure: quiz before and after; green use cases tried; near-misses caught; minutes per task on two or three tasks, timed by hand; one quote per rep. Report raw numbers and the reps' words, never percentages from a group of five.

What you do not promise: time saved, revenue, adoption. "I'll measure it with you" is the whole promise.

---

11. Close

"Can we agree on three reps, three green use cases, and a check-in at day 30? I'll send the plan today and the questions for your Legal and IT teams."

Then confirm three things before you hang up: the sponsor's name, the rep count, and the day-30 date. If they can't give all three, ask which one is blocking and who owns it.

If the answer is "not now": "Understood. What would need to change?" Write it down. Ask whether sending the Legal and IT questions anyway is useful.

---

12. After the call

Within the hour, the follow-up email (draft, under 120 words, their words for the priorities):

> Subject: Pilot plan and the two pages for Legal
>
> Thanks for the time today. You said the two things that matter are [priority one, their words] and [priority two, their words].
>
> Attached: the 90-day pilot plan for [N] reps, and the Legal and IT question list. The two pages your team asked about are Anthropic's privacy page on commercial data (dated Aug 18, 2026) and the Enterprise plan page.
>
> Next step: [sponsor] confirms the reps by [date], and we hold the day-30 review on [date].
>
> [Name]

The CRM note (logged after you read it):

- Stage after the call
- Pains heard, in their words
- Decision process: who, how, by when, or "unclear"
- Current tools and account type (personal or company)
- Open questions for the account team
- Unclear from the call

The Legal and IT question list to attach:

1. Which plan, Team or Enterprise, and who is the Owner?
2. Will member feedback ("Rate chats") be turned off for the pilot?
3. Which connectors, if any, may be enabled, and by whom?
4. Is a BAA needed, and which models and features does it cover?
5. Does any data need to stay in a region, and does that require a cloud-platform deployment instead of claude.ai?
6. What is the retention setting, and who can see audit logs?
7. Which data classes may reps paste under the traffic-light rule (public, internal, customer, personal)?

---

13. Honest limits and the confirm register

Item	Status on Nov 4, 2026	What to do
Training default, commercial	Verified, dated page	Quote it
Consumer five-year retention on opt-in	Stated in Anthropic's Aug 28, 2025 news post; not re-read today	Re-read before quoting the number
Team vs Enterprise feature split	Verified; one conflict on role-based access between the help article and the pricing table	Say "check the current pricing page"
Prices	Verified on claude.com/pricing; page says they may change	Send the page, don't memorize
Certifications	Verified list; HIPAA is a configuration with a BAA, not a certification	Say "HIPAA-ready configuration"
Data residency for claude.ai	No regional storage listed; US-only inference is the listed Enterprise feature	Hand to the account team
HubSpot connector approval rule	Not stated on the connector page	Say "reps review and send," per Anthropic's sales page, and no more
Competitor facts	None collected, by rule	Never compare

14. Practice

Run each of these with Claude playing the buyer, ten minutes each. Improv rules: accept what the buyer gives you, answer the question asked, and when you don't know, say so and move on.

1. **The cautious RevOps lead.** "Act as a RevOps lead whose Legal team blocked ChatGPT last year. Open hostile. Push on training, residency and HIPAA. End the call only when you hear a fact with a date or an honest 'I'll check.'"
2. **The enthusiastic VP.** "Act as a sales VP who wants every rep on AI next week. Resist every attempt to slow down. Ask for revenue promises. Accept only a pilot shape with measures."
3. **The comparison trap.** "Act as a sales director who keeps asking which vendor is better. Keep asking in different ways. Note every time the seller compares vendors or states a fact without a source."

After each run, ask Claude for the three lines you said that you could not source. Fix them against section 3.
